PROFILE

Motivated and detail-oriented trainee full stack developer with a Diploma in Computer Engineering and hands-on experience building web applications using HTML, CSS, JavaScript, SQL, PHP and Node.js. Solid programming fundamentals in Java, C and Python. Eager to apply strong problem-solving skills and a continuous-learning mindset to an entry-level Software Developer role, contributing to real-world projects while growing technical expertise.

EDUCATION

Diploma in Computer Engineering — Cape Peninsula University of Technology (CPUT) 2024 – 2025

Completed and graduated, 2025

National Senior Certificate (Matric) — Camps Bay High School 2019 – 2023

TRAINING / PRACTICAL EXPERIENCE

Trainee Full Stack Developer — Life Choices Academy April 2026 – Present

- Undergoing intensive, hands-on training in full stack web development, covering front-end and back-end technologies.
- Building and deploying personal projects to apply core programming and web development concepts.
- Practising version control and collaborative workflows using Git and GitHub.

PROJECTS

Personal Portfolio Website

- Designed and built a multi-page personal portfolio site (Home, About, Projects, Contact) using HTML, CSS and JavaScript, including a working contact form.

Quiet Hours — Web App

- Built a web application that lets users set notification quiet hours, using JavaScript and browser local storage.

Modern Tech Project — HR System

- Developed an HR management system to handle core human resources functions such as employee records and administrative workflows.

Simple Chat Application (Java)

- Built a simple chat application in Java, applying object-oriented programming and networking fundamentals to enable message exchange between users.

Calculator (C)

- Developed a functional calculator application in C, demonstrating core programming logic and control structures.

Python Mini Toolkit

- Built a mini toolkit of Python scripts for performing common everyday tasks, applying multiple programming concepts.

TECHNICAL SKILLS

- Languages: JavaScript, Python, Java, C, PHP, SQL
- Web Technologies: HTML, CSS, Node.js
- Tools: Git, GitHub, Microsoft Office, VS Code, Code::Blocks, MySQL, XAMPP, Siemens TIA Portal, OBS Studio
- Concepts: Full stack web development, version control, database fundamentals, PLC (Programmable Logic Controllers)

ADDITIONAL INFORMATION

- Available for remote and local work opportunities in Cape Town and surrounding areas.
- Strong communicator with a collaborative approach and a genuine passion for continuous learning.
